

Langkah Membuat Akun dan Website Baru ISPConfig3

1. Buat akun baru

1. ISPConfig > Client

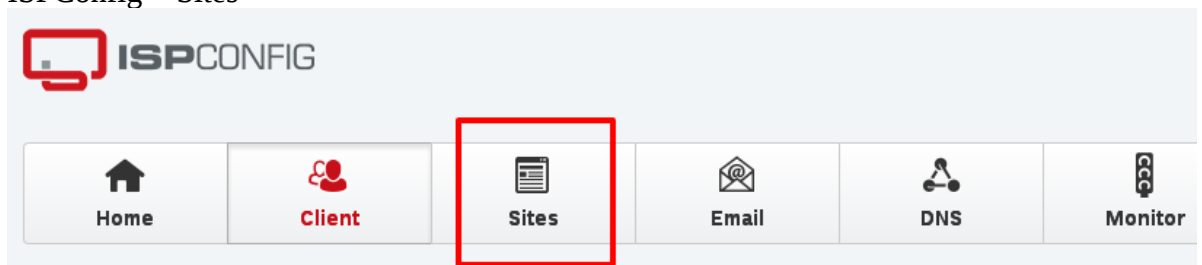

2. Client > Add new client

3. Isi form > save

2. Tambah Site

1. ISPConfig > Sites

2. Add new website

3. Isi form > Save

Web Domain

Domain	Redirect	SSL	Statistics	Backup	Options
--------	----------	-----	------------	--------	---------

Server:

Client:

IPv4-Address:

IPv6-Address:

Domain:

Harddisk Quota: MB

Traffic Quota: MB

CGI: ☒

SSI: ☒

Perl: ☒

Ruby: ☒

Python: ☒

SuEXEC: ☒

Own Error-Documents: ☒

Auto-Subdomain:

SSL: ☒

Let's Encrypt SSL: ☒

PHP:

PHP Version:

Web server config:

Active: ☒

4. Pilih website yang baru dibuat untuk di-Edit

Websites

ID	Active	Client	Server	Domain	
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
2	Yes	Blendi Moy :: blendimoy blendimoy (blendimoy, C2)	panel.freshon.co.id	blendimoy.com	<input type="button" value="edit"/> <input type="button" value="stats"/> <input type="button" value="delete"/>

5. Pilih SSL

Web Domain

Domain	Redirect	SSL	Statistics	Backup	Options	
--------	----------	-----	------------	--------	---------	--

6. Isi form > save

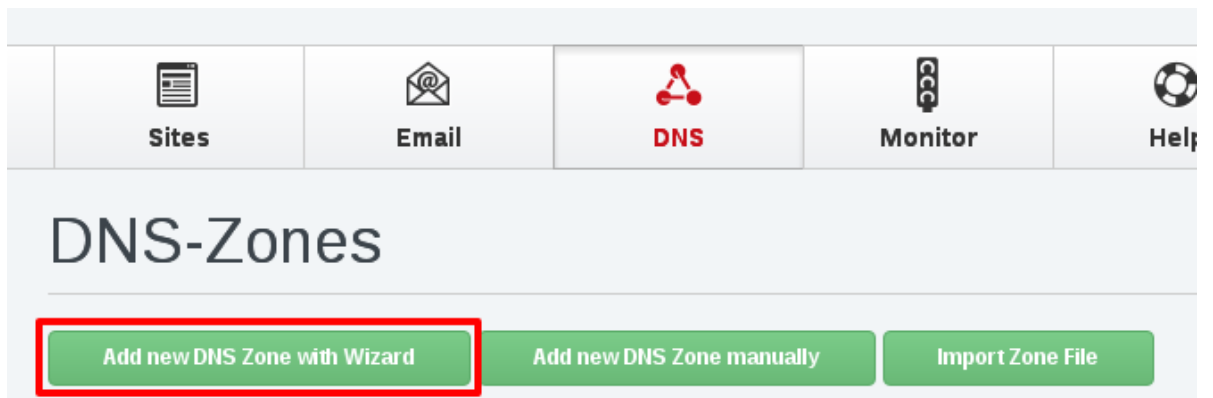

[details](#) [Reset data](#)

State:	<input type="text" value="Jawa Timur"/>
Locality:	<input type="text" value="Blitar"/>

- 7.
3. Membuat DNS Zone
 1. ISPConfig > DNS > Add new DNS

2. Isi form > create dns record

Template:

Server:

Client:

Domain:

IP Address:

NS 1:

NS 2:

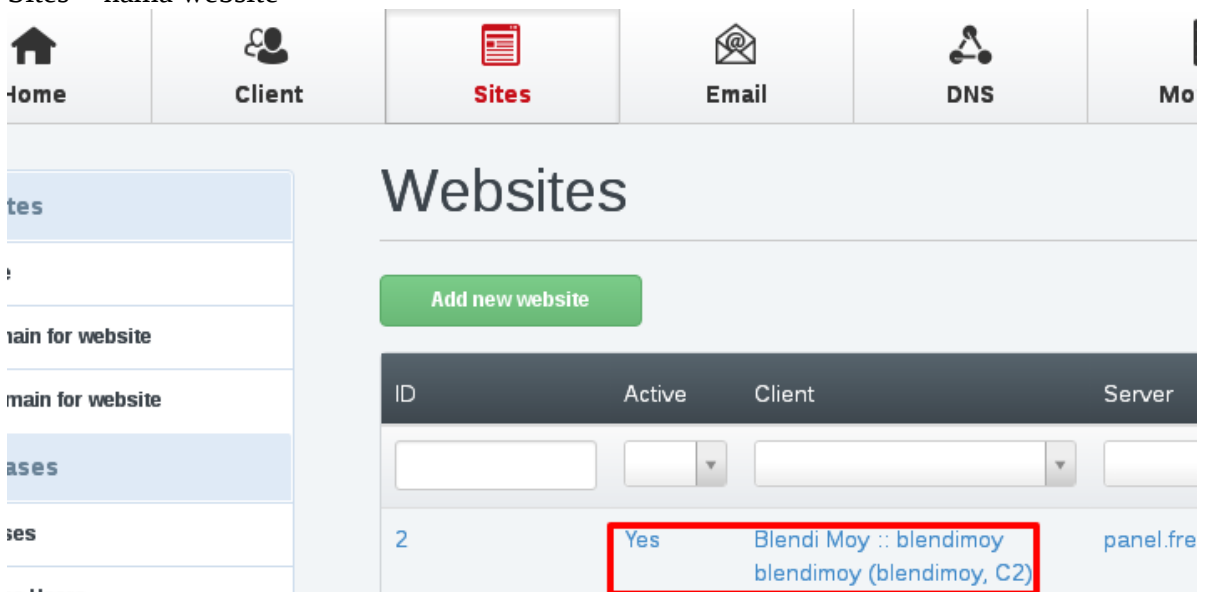

Email:

DKIM: ☒

DNSSEC: ☐

4. HTTPS

1. Sites > nama website

2. Di tab Domain, Check ssl & let's encrypt ssl > save

Own Error-Documents: ☒

Auto-Subdomain:

SSL: ☒

Let's Encrypt SSL: ☒

PHP:

PHP Version:

3. Di tab redirect

main	Redirect	SSL	Statistics	Backup	Options
------	----------	-----	------------	--------	---------

Redirect Type:

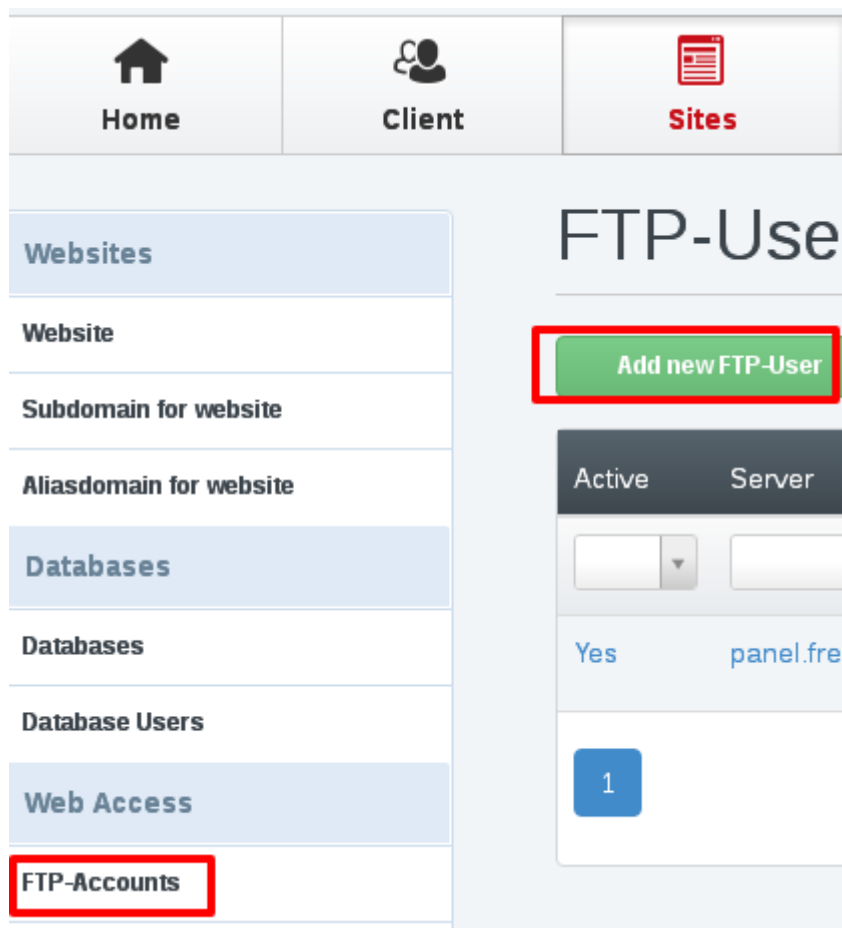

Redirect Path:

SEO Redirect:

Rewrite HTTP to HTTPS: ☒

5. Membuat Akun FTP

1. Sites > Ftp-Accounts > Add new ftp user

2. Isi form > save

Website:

Username:

Password:

Password strength: Very strong

Repeat Password:

The passwords do match.

Harddisk-Quota: MB

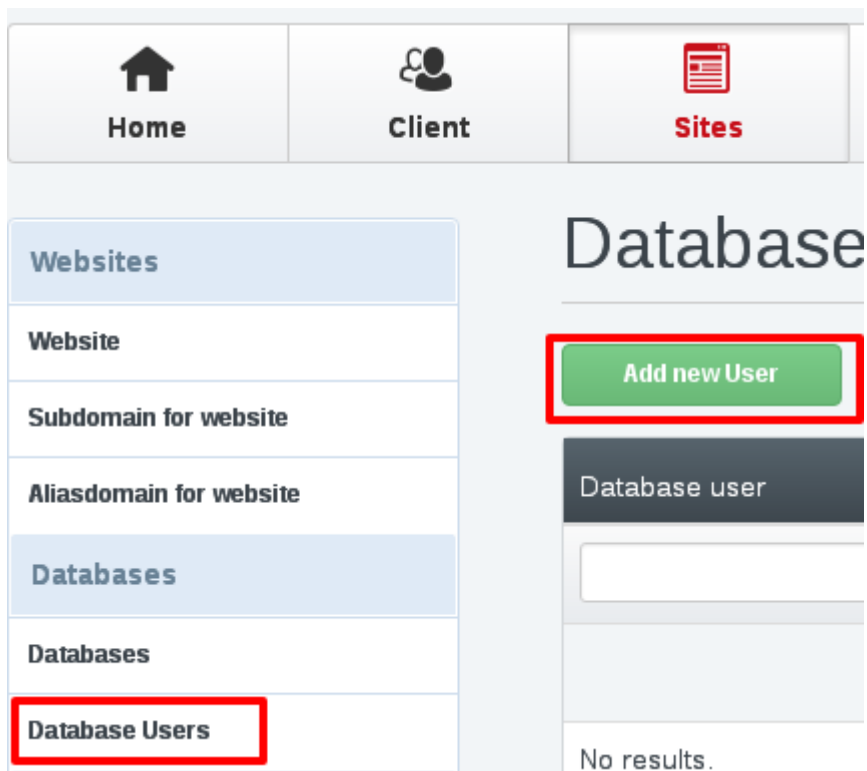

Active: ☒

user ftp: namaclientftpusername

3.

6. Database

1. Sites > Database Users > Add new User

2. Isi Form > Save

Client:

Database user:

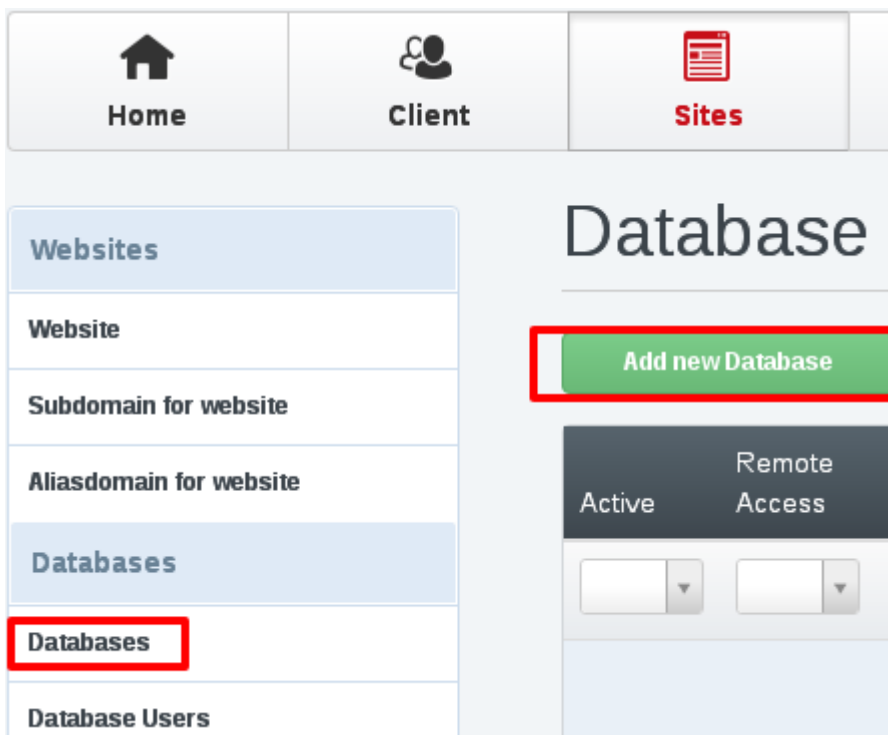

Database password:

Password strength: Very strong

Repeat Password:

The passwords do match.

3. Sites > Databases > Add new Database

4. Isi Form > Save

Server:

Site:

Type:

Database name:

Database quota: MB

Database user:

Database user:

optional

Database charset:

Remote Access: ☐

(separate by ,
blank for any):

Active: ☒

7. SSH User

1. Sites > shell-users > Add new shell-user

Home

Client

Sites

Websites

Website

Subdomain for website

Aliasdomain for website

Databases

Databases

Database Users

Web Access
